MP3 Advertising on Hold Player

Platinum MP-3000

The Platinum MP-3000 is an Advertising on Hold player which can be connected to any PABX/KTS to provide music/messages to callers put on hold in your business. The Platinum MP-3000 supports MP3 audio files which can be easily updated via the supplied USB key.

The Platinum MP-3000 stores the audio in MP3 format to achieve near CD quality audio playback. As the audio files are stored in a non-volatile flash memory, the content is retained even after a power failure. The 100% Digital Playback ensures reliable 24/7 operation.

The Platinum MP-3000 uses commonly available USB keys (1x Supplied in kit) or SD/MMC cards to enable audio updating for dealers using existing or obsolete equipment.

The Platinum MP-3000 features a unique cycle button; it will play either individual files or cycle one specific file by a simple press of a button.

Plug and Listen

The Platinum MP-3000 is installed simply by plugging into the LIU attached to the Music on Hold port of your telephone.

Features

- MP3 files can be downloaded to the unit via the supplied USB. You simply drag and drop files from your PC to the USB key then re insert in the player to start playing.
- The Platinum MP-3000 connects to the Music on hold port of any telephone system fitted with an LIU (Line Isolation Unit)
- 128 minutes (128Mb) of space available for MP3 Music or recordings.
- Message/music stored in non-volatile memory with no batteries required.
- 6 minutes of advertising on loop
